Le Français comme outil d'ouverture sur le monde

PORTUGAL

13-20 January 2018

Agrupamento de Escolas Frei Heitor Pinto

During our stay in Covilha in Portugal last year we visited the whole town and some typical glimpses of it, but not only…

We worked together to the creation of a logo and a brochure of this project on which everyone has inserted their own ideas.

Above all this trip allowed us to confront ourselves with our European correspondents about what the human rights are and why they are so important.

After having worked a lot, we took part in some interactive activities to know each other a little bit better. We had the possibility to be present at a theatrical performance about human rights played by our portugues friends and in closing there was a ceremony during which we received the certificates.

Despite some difficulties, all the activities in which we had to take an active part allowed us to build up our knowledges and mainly improve both the foreign languages (French and English).

BULGARIA

14-18 May 2018

Lycee general «Dimcho Debelyanov»

«UNIS, EGAUX ET TOLERANTS», this was the main theme of the second mobility in a small town called Belene.

After having visited Belene, we focused on the study of foreign languages and particularly on French that could become the first language of the UE after the Brexit.

We realized that there are many francophone countries and we talked about the multilingualism and why nowadays it is so important to travel and communicate.

We spent a whole afternoon in an educational center where we enjoyed ourselves in different activities mainly proposed to communicate and develop our lingual knowledges.

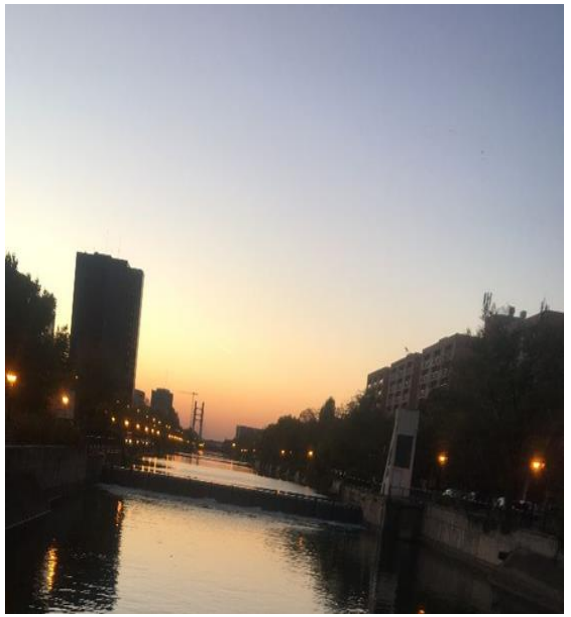
The main themes we talked about referred to the future of young Europeans, the invitation to cultivate love and tolerance, human rights but also the duties of everyone, the responsabilities and the freedom that mustn't be violated in any case.

Instead, in Sofia, we had the possibility to visit the francophone University where the French is considered a bridge to open ownself to the world and to the others.

ROMANIA

15-19 October 2018

Collège technique «Carol I»



Last autumn we spent some days in the European capital of Bucarest.

In this third mobility we talked a lot with some experts about the equality and the gender discrimination

Each country presented the work made at school before the departure and in particular, our project centered on the violence against women.

We celebrated all together the hundredth anniversary of the national rumanian state and visited the famous castles of Peles and Bran (a.k.a. the Dracula's one). Moreover as we do in the other mobilities we dedicated time to some interactive activities during which we worked hard and at the same time we had fun.

In these days we perfected the website of this project that is getting more and more interesting and completed thanks to these mobilities all over the Europe.
